#### INTRODUCTION

English is an international language .In Thai English is very important especially in education and to get the job .For the formal and informal education are very important to get English certificate and get English knowledge.

English is a language that Thai people use as a foreign language. Thai people start to study English from the Elementary School up to higher education level. Many of Thai people think that English is hard to understand, because of the complexity of English. As a foreign language, it is difficult for beginners. The different rule of English and Thai languages is the main point of difficulties. English has complex rules but Thai languages is simple. It means that Thai must learn more about English. Alan, noted "Learning is something of which we all have an understanding and in which we have all participated".

Speaking is active use of language, but differ in the mental activity involved and demands that they make on learners of language in term of finding and sharing meaning. Speaking with good pronunciation is not easy for Thai students, they do not speaking in English can be cause by social condition of students which accustomed to using their local languages so that foreign language is difficult to be accepted and communicated.

English speaking ability most difficult thing for the students. The student got bored easily, lazy for study if the English lesson. They were afraid to speak English in the class, and most of them were shy to spoken English because their mistakes in grammar, lack of vocabulary, they did not know how to express say the words correctly, so they got shy to communication with their friends by using speak English, and this Problems make the students lazy and did not pay attention to the teacher because got bored. In fact, the teacher was not good enough in English teaching in the class.

Thai students are expected to be able to communicate effectively in English but they have problem to differentiate English pronunciation from Thai language. They also still encounter problems of difficulties in their face to face oral communication although they use English most of the time in the classroom.

According to Yarnruksa, this may be partly due to lake of confidence in expressing themselves in English. There are many solutions that might help Thai students to solve their problems in learning English in Thai environment.

In addition, one of the demands of learning speaking on Lesson Plan is such as "The students are skilled in speaking in front of the class in a group expressing "Asking, Giving, and Refusing advice". Generally, learning speaking activity is presented by the teacher to the students at the beginning of learning in each semester. That action is done based on the teacher's paradigm that speaking activity is light and the teacher feels the student is capable of mastering it.

Naturally, Darunsat Wittaya School at Pattani has implemented learning English speaking program in English subject to all students as the regulations on Syllabus that has published by Ministry of Education (nfletae@lnarf) Republic of Thailand.

In addition, it also adds mastered of English as a requirement to graduate from Mattayom Education. It is one of private Boarding School founded by Sir. H. Ahmad Bin Usman Samea on 1957 located on Saiburi, Pattani at South of

Thailand. In addition, on 1978, the school headed by Mr. Nikmuktar Waba has adopted Modern Recitation Curriculum that purposed to get interaction to foreigners, also it has opened 2 recitation systems, consist of: Religious Streams and Academic Streams. Now it has 3,500 pupils that studying at this Religious School. Never the less in the fact, in learning English speaking, most of Mattayom 3 students encounter obstruction in mastered English speaking based on the researcher pre observation at this private school.

Based on the curriculum in Thailand, it is not that the students are demanded to have good achievement in speaking. It means that speaking is important in teaching and learning English which should be mastered by the students. Theirs for, students have to be able improve their speaking achievement and also study about the aspect which is needed to product a good speaking. The goal of learning English is to be able to communication in English understandably.

Based on the observation Mathayom 3 at Darunsat Witaya Islamic School in Pattani Thailand. Theirs were many students' who gold difficulties in speaking. First, the students got awesome difficulties in delivering ideas. Happened because they were low in developing their thinking in speaking. Second, the students were low in arranging the sentences well in their speaking concisely. Thirdly, there were also worried about grammar and vocabulary. It is proved when the students were speaking, they did not considered about the cored grammar and precise punctuation. Thus, the students much think carefully to make the speaking becomes better. And finally, students tend to have problems with expression, courage, and most students are shy. When students are asked to speak English in front of the class Students are afraid to speak for fear of being laughed at by their peers and afraid of being scolded by the teacher if they say something wrong.

Based on the explanation and problem by Thai students above the researcher is interested in conducting research entitled" :An Analysis Of Thai Students Problems In English Speaking Mathayom 3 At Darunsat Witaya Islamic School In Pattani Thailand".

#### **RESEARCH METHOD**

This research design of this study has been conducted by using descriptive qualitative research. Kriyantoro said that, qualitative research that aims to explain phenomena by collecting data as deep as possible Qualitative research emphasizes the depth of data obtained by researchers. The deeper and more detailed the data obtained, the better the quality of this qualitative research. Descriptive research is research that is conducted to describe a variable, either one or more variables (independent) without making comparisons, or variables that are connected to one other variable. Sugiyono in this research, the researcher uses descriptive research which attempts to describe the student's difficulty in mastering English speaking ability.

This study is categorized into qualitative research. Qualitative research is a means for exploring and understanding the meaning individuals or groups ascribe to a social or human problem. The process of research involves emerging questions and procedures. Data typically collected in the participant's setting. Data

analysis inductively building from particulars to general themes, and the researcher making interpretations of the meaning of the data. The final written report has a flexible structure.

According to Arikunto collecting the data in the research was the ways that can be used by researcher to collect data .In this research, the researcher used written test .The written test is some questions that are used to measure the knowledge, intelligence, skill or ability from individual or group.
